PROJECTS

My Portfolio | Tech Used: Angular, Node.js, Express.js, MongoDB, HTML, CSS

- Developed a professional portfolio to showcase projects, technical skills, and achievements. Integrated a dynamic contact form and chatbot (Collect.chat) for interactive user engagement.

Personal Finance Application | Tech Used: MEAN Stack (MongoDB, Express.js, Angular, Node.js)

- Built a finance tracker to manage loans, track daily payments, and calculate balances. Added search functionality for financial records and implemented update/delete operations.

Recipe Recommendation | Tech Used: MEAN Stack

- Developed a recipe application that allows users to browse, search, filter, and save their favorite recipes. Included keyword-based search and category filters (e.g., ingredients, food type).

Summarizer Website | Tech Used: MEAN Stack, OpenAI API

- Created a text summarization web app using the OpenAI API to generate concise summaries from user input. Integrated Angular frontend with Node.js backend and MongoDB for saving summaries.

Real Estate Management | Tech Used: MEAN Stack

- Built an application to manage property listings with full CRUD (Create, Read, Update, Delete) functionality. Enabled users to view, edit, and delete real estate entries through a clean user interface.
